Subject: Model 700 Gas Chromatograph Obsolescence Final Notification

Dear Valued Customer,

This letter is being sent as a final notification that as of October 1st, 2024, the Model 700 Gas Chromatograph will be obsoleted and Emerson will no longer provide spare parts or support the Model 700 Gas Chromatographs. Until October 1st, 2024, spare parts will continue to be available while supplies last. A list of available spares can be found on page 2. Spare parts shown in red are unique to the Model 700 and will have limited availability.

If you require any spare parts for your Model 700 GCs, it is recommended that you purchase those spare parts as soon as possible. Alternatively, it is highly recommended that you plan an upgrade path to the Model 700XA Gas Chromatograph which is Emerson's industry leading replacement product for the obsolete Model 700.

Should you have any questions or concerns regarding this notification, please contact your Emerson gas analysis sales representative or reach out to me at the contact information above.

Thank you for your continued support of Emerson and our world class products.

Regards,

A handwritten signature in black ink, appearing to read "Trever Ball", with a stylized flourish.
